

## CWPE WORKING PAPERS—INSTRUCTIONS FOR AUTHORS

The **Cambridge Working Papers in Economics** (CWPE) series is intended for early dissemination of the following kinds of research output:

- Papers that will be submitted to journals, or as chapters in edited books, for which early dissemination and the resulting comments are advantageous
- Papers which contain important research findings that may be inappropriate for a journal (e.g. too many tables or graphs) but are destined to become serious sections of occasional papers or monographs or be edited down later to journal length
- Articles that have been published in another language

Papers submitted for the series should be emailed in pdf format to the **Research Administrator** ([research-admin@econ.cam.ac.uk](mailto:research-admin@econ.cam.ac.uk)), who will seek approval for publication.

Papers should be formatted according to the following style guidelines:

(i) General formatting and fonts:

The first page of the text should be numbered 1 (centre bottom) and contain the title, author(s), address/affiliation, date, an abstract of **no more than 150 words**, JEL classification (please see <http://aeaweb.org/journal/elclasjn.html>), and keywords. **Acknowledgement of any associated grant-giving body should be made, quoting reference number.**

Suggested font definitions: 12 pt Times Roman, 10 pt for footnotes. Fresh paragraphs should be shown by an indent rather than a double line space.

(ii) Bibliography format:

(a) Book: author/editor name(s) with the family name first, (date of publication in brackets), *title in italics*, series if relevant, name of publisher  
e.g. Mitton, L., Sutherland, H. and Weeks, M. (eds) (2000) *Microsimulation Modelling for Policy Analysis: Challenges and Innovations*, DAE Occasional Paper No. 65, Cambridge University Press

(b) Article: author(s) with family name first, (date of publication in brackets), 'article title in single quotes', *journal name in italics*, volume and page numbers.  
e.g. Chadha, J. S., and Dimsdale, N. (1999) 'A long view of interest rates', *Oxford Review of Economic Policy*, pp 17-45

(iii) A pdf file will be required for posting on the Faculty website

(iv) **It is up to the author to ensure that no copyright agreements are infringed by publication.**
